FINANCIAL REPORTING

Time: $2^1/_2$ Hours **Max Marks: 60**

SECTION – A

Answer any FIVE of the following. **(5x2=10)**

1. What are the different elements of financial statements?
2. A piece of machinery has an annual service costing $10,000. During the most recent service it was decided to replace part of the engineering meaning that it will work faster and produce more units of product per hour. The cost of the replacement part is $20,000. Would this expenditure be treated as asset or expense items?
3. What is the distinction between revenue grants and capital grants?
4. An entity has incurred the following expenditure during the current year:
   (i) $500,000 spent on developing a new line of confectionery, including $150,000 spent on researching the product before management gave approval to fully fund the project.
   (ii) Training costs for staff to use a new manufacturing process. The total training costs amounted to $100,000 and staff are expected to remain for an average of 5 years. Explain the accounting treatment for the above issues.
5. What is a compound instrument in the context of financial instruments?
6. Why does IAS 41 not apply to intangible assets, and how are these assets measured according to accounting standards?
7. What is a non-controlling interest?

St Aloysius (Deemed to be University) LIBRARY
MANGALURU - 575003

SECTION - B

Answer any FOUR of the following. **(4x5=20)**

8. An entity started construction on a building for its own use on 1 April 20X7 and incurred the following costs:

Particulars	$000
Purchase price of land	250,000
Stamp duty	5,000
Legal fees	10,000
Site preparation and clearance	18,000
Materials	100,000
Labour (period 1 April 20X7 to 1 July 20X8)	150,000
Architect's fees	20,000
General overheads	30,000
	583,000

Contd...2

The following information is also relevant:

- Material costs were greater than anticipated. On investigation, it was found that materials costing $10 million had been spoiled and therefore wasted and a further $15 million was incurred on materials as a result of faulty design work.
- As a result of these problems, work on the building ceased for a fortnight during October 20X7 and it is estimated that approximately $9 million of the labour costs relate to this period.
- The building was completed on 1 July 20X8 and occupied on 1 September 20X8.

You are required to calculate the cost of the building that will be included in tangible non-current asset additions.

9. On 1 December 20X1, Wade receives an order from a customer for a computer as well as 12 months of technical support. Wade delivers the computer (and transfers its legal title) to the customer on the same day. The customer paid $420 on 1 December 20X1. The computer normally sells for $300 and the technical support for $120.

   Required: Illustrate the 5 steps of revenue recognition as per IFRS 15

10. On 1 January 20X1, Dynamic entered into a two-year lease for a lorry. The contract contains an option to extend the lease term for a further year. Dynamic believes that it is reasonably certain to exercise this option. Lorries have a useful life of ten years. Lease payments are $10,000 per year for the initial term and $15,000 per year for the option period. All payments are due at the end of the year. To obtain the lease, Dynamic incurs initial direct costs of $3,000. The interest rate within the lease is not readily determinable. Dynamic's incremental rate of borrowing is 5%.

    Required: Calculate the initial carrying amount of the lease liability and the right of-use asset and provide the double entries needed to record these amounts in Dynamic's financial records.

11. Boxer purchased a non-current asset on 1 January 20X1 at a cost of $30,000. At that date, the asset had an estimated useful life of ten years. Boxer does not revalue this type of asset, but accounts for it on the basis of depreciated historical cost. At 31 December 20X2, the asset was subject to an impairment review and had a recoverable amount of $16,000. At 31 December 20X5, the circumstances which caused the original impairment to be recognised have reversed and are no longer applicable, with the result that the recoverable amount is now $40,000.

    Required: Explain, with supporting computations, the impact on the financial statements of the two impairment reviews.

Contd...3

12. On 31 December 20X1, the issued share capital consisted of 4,000,000 ordinary shares of 25¢ each. On 1 July 20X2 the entity made a rights issue in the proportion of 1 for 4 at 50¢ per share and the shares were quoted immediately before the issue at $1. Its trading results for the last two years were as follows:

	Year ended 31 December	
	20X2 $	20X1 $
Profit after tax	425,000	320,000

Show the calculation of basic EPS to be presented in the financial statements for the year ended 31 December 20X2 (including comparative).

13. An entity purchases an aircraft that has an expected useful life of 20 years with no residual value. The aircraft requires substantial overhaul at the end of years 5, 10 and 15. The aircraft cost $25 million and $5 million of this figure is estimated to be attributable to the economic benefits that are restored by the overhauls. In year 6, the cost of the overhaul is estimated to be $6 million. Calculate the annual depreciation charge for the years 1–5 and years 6–10.

SECTION - C

Answer any <u>THREE</u> of the following. **(3x10=30)**

14. How does the regulatory framework influence the development and enforcement of accounting standards and also discuss the role of regulatory bodies in overseeing financial reporting practices and maintaining transparency in financial markets.

Warranty provision		90
Distribution costs	240	

Contd...4

Land and buildings: at cost (Land $110,000, Buildings $100,000) accumulated depreciation (at 1 April 20X8)	210	 48
Plant and machinery: at cost accumulated depreciation (at 1 April 20X8)	125	 75
Retained earnings (at 1 April 20X8)		270
10% Loan note (issued in 20X7)		80
Purchases	470	
Sales		1300
Inventory (at 1 April 20X8)	150	
Trade payables		60
Trade receivables	728	
	2123	**2123**

Additional information

i) Inventory at 31 March 20X9 was valued at $250,000.

ii) Buildings and plant and machinery are depreciated on a straight-line basis (assuming no residual value) at the following rates:

On cost: Buildings	5%
Plant and machinery	20%

iii) There were no purchases or sales of non-current assets during the year to 31 March 20X9.

iv) The depreciation charges for the year to 31 March 20X9 are to be apportioned as follows:

Cost of sales	60%
Distribution costs	20%
Administrative expenses	20%

v) Income taxes for the year to 31 March 20X9 are estimated to be $135,000.

vi) The 10% loan note was issued on 1 April 20X7 and is repayable five years from that date.

vii) The year-end provision for warranty claims has been estimated at $75,000. Warranty costs are charged to administrative expenses.

Required: Prepare Picklette's statement of profit or loss for the year to 31 March 20X9 and a statement of financial position as at that date.

17. ABC Co has a year end of 31 December 20X1 and uses the dollar ($) as its functional currency.

On 25 October 20X1 ABC Co buys goods from a Swedish supplier for Swedish Krona (SWK) 286,000.
