The following notes are relevant to the preparation of the consolidated financial statements:

- (i) Port acquired 80% of the ordinary shares of Starboard for \$300,000 on 1 January 20X2. At the acquisition date, the retained earnings of Starboard were \$150,000. The fair value of the non-controlling interest in Starboard at the date of acquisition was \$80,000.

(ii) At the date of acquisition, the fair values of the net assets of Starboard approximated their carrying amounts, with the exception of a plot of land. This land was recorded in the financial statements of Starboard at its cost of \$150,000 but was estimated to have a fair value of \$180,000. This land was still owned by Starboard at 31 December 20X6.

(iii) During the year ended 31 December 20X6, Port sold goods to Starboard for \$50,000 making a gross profit margin on the sale of 25%. 60% of these goods had been sold by Starboard by 31 December 20X6. At the reporting date, Starboard still had a payable due to Port for \$30,000, and this agreed with the receivable recorded in Port's accounting records.

D. Read the following passage and answer the questions that follow: (5x1=5)

Too many parents these days can't say no. As a result, they find themselves raising children who respond greedily to the advertisements aimed right at them. Even getting what they want doesn't satisfy some kids; they only want more. Now a growing number of psychologists, educators and parents think it's time to stop the madness and start teaching kids about what's really important: values like hard work, contentment, honesty and compassion. The struggle to set limits has never been tougher and the stakes have never been higher.

One recent study of adults who were overindulged as children paint a discouraging picture of their future: when given too much too soon, they grow up to be adults who have difficulty coping with life's disappointments. They also have a distorted sense of entitlement that gets in the way of success in the workplace and in a relationship. Psychologists say that parents who overindulge their kids set them up to be more vulnerable to future anxiety and depression.

The oldest members of this generation were born in the late 1980s, just as PCs and video games were making their assault on the family room. They think of MP3 players and flat-screen TV as essential utilities, and they have developed strategies to get them. One survey of teenagers found that when they crave for something new, most expect to ask nine times before their parents give in. By every measure, parents are shelling out record amounts. In the heat of this buying blitz, even parents who desperately need to say no find themselves reaching for their credit cards.

Today's parents aren't equipped to deal with this problem. Many of them were raised in the 1960s and 70's, and had sworn they would act differently from their parents and have closer relationships with their own children. Many even wear the same designer clothes as their kids and listen to the same music. But they have long and hectic work life. At the end of a long week, it's tempting to buy peace with 'yes' and not mar precious family time with conflict.

Anxiety about the future is another factor. How do loving parents say no to all the sports, arts and language lessons they believe will help their kids thrive in an increasingly competitive world? Experts agree: too much love won't spoil a child. Too few limits will. What parents need to find, is a balance between the advantages of an affluent society and the critical life lessons that come from waiting, saving and working hard to achieve goals. That search for balance has to start early.

Children need limits on their behaviour because they feel better and more secure when they live within a secured structure. Children learn self-control by watching how others, especially parents act. Learning how to overcome challenges is essential to becoming a successful adult. Few parents ask kids to do chores. They think their kids are already overburdened by social and academic pressures. Yet, every individual can be of service to others, and life has meaning beyond one's own immediate happiness. That means parents eager to teach values must take a long, hard look at their own.

1. What are the potential consequences, as mentioned in the passage, for adults who were overindulged as children, particularly in terms of their workplace success and mental health?

- a) They are more likely to achieve workplace success and have better mental health.
- b) They are likely to have difficulties coping with life's disappointments and distorted senses of entitlement.
- c) They tend to be more resilient in the face of challenges and have lower anxiety levels.
- d) They are less vulnerable to anxiety and depression but often struggle with entitlement issues.

2. Why do some parents find it challenging to say no to their children's desires, according to the passage?

- a) They are like to spoil their kids.
- b) Parents are following age old traditions of bringing up kids.
- c) They are not bothered about children's their well-being.
- d) They are anxious about the future and want their children to have every advantage.

3. What does the passage suggest is the importance of teaching values and setting limits for children in an affluent society?

- a) It is unnecessary because children naturally learn these values on their own.
- b) It is vital for helping children thrive in an increasingly competitive world.
- c) It is a luxury that only a few privileged children can afford.
- d) It is detrimental to children's exam grades.

ST ALOYSIUS COLLEGE LIBRARY
MANGALURU - 575 003

4. What is the main challenge mentioned in the passage regarding parenting in an affluent society?

- a) Balancing the advantages of affluence with teaching essential life lessons.
- b) Providing children with unlimited access to material possessions.
- c) Meeting the high expectations of children for constant gratification.
- d) Dealing with the financial demands of an affluent lifestyle.

5. According to the passage, why do children need limits on their behaviour?

- a) To make them feel more secure within a structured environment.
- b) To limit their social and academic expectations.
- c) To encourage them to lower their goals.
- d) To teach them to be self-conscious.

VII. COMPREHENSION

(5x2=10)

Je m'appelle Peter. Aujourd'hui, je vais vous parler de mes hobbies. En fait, il y a beaucoup de choses que j'aime faire dans la vie. Comme beaucoup de personnes, je passe beaucoup de temps à regarder des séries. En ce moment, je regarde un épisode par jour de « Dix Pour Cent ». C'est une série française que je trouve vraiment drôle. Sinon, je suis passionné par l'astronomie depuis que je suis tout petit. Je n'ai jamais fait d'études d'astronomie, mais je suis un vrai geek. J'apprends tout en autodidacte. Je regarde souvent des documentaires scientifiques sur l'espace et l'univers. J'aime aussi écouter de la musique. La musique que j'écoute le plus souvent est le blues. Mais j'aime bien tous les types de musiques, sauf le reggae.

Enfin, ce n'est pas que je n'aime pas le Reggae. C'est juste que je n'arrive pas à écouter du reggae plus de 30 minutes. Sinon, j'écoute du jazz manouche, du rock, du hard rock et de la musique classique. J'aime aussi tout particulièrement la musique des années 60. Je ne joue pas d'instrument de musique, je me contente de l'écouter. Mais plus tard, j'aimerais bien jouer de la basse. Récemment, je me suis découvert une passion pour les bandes dessinées. J'ai toute une collection. Je suis en ce moment en train de lire « Black Sad », une bande dessinée espagnole. Je ne trouve pas les histoires très intéressantes, mais les dessins sont incroyables. J'aimerais bien savoir aussi bien dessiner. Je crois que c'est à peu près tout. Et vous, quelles sont vos passions ?
