**VII COMPREHENSION****(5x1=5)**

Les Français regardent la télévision en moyenne 3h 21 par jour. Tous les Français reçoivent chez eux six grandes chaînes de télévision publiques et privées. Certaines chaînes privées sont gratuites, comme TF1 et M6. Et d'autres sont payantes. Canal + (la chaîne du sport et du cinéma), par exemple; diffuse une partie de ses programmes << en clair >> (tout le monde peut les voir), et une autre partie de ses programmes est cryptée (seules les personnes qui payent un abonnement peuvent les voir). Les chaînes publiques sont financées en partie par les Français qui ont un poste de télévision. Ils payent une taxe qui s'appelle <<< la redevance >> et qui représente 76% des ressources de la télévision publique. Ces chaînes publiques étaient également financées par la publicité. Mais elles n'en diffusent plus après 20h, depuis janvier 2009. Chaque chaîne du service public a une mission un peu différente. France 3, est une chaîne qui diffuse des programmes nationaux mais aussi locaux et régionaux (il y a par exemple six éditions en langue régionale : alsacien, provençal, etc.) et France 5, elle, est une chaîne à vocation éducative et de découverte. Arte, enfin, est une chaîne franco-allemande à vocation culturelle européenne.

**Les questions :**

1. Combien d'heures par jour les Français passent-ils devant la télé ?
2. Que signifie << crypté (e) >> ?
3. Citez une chaîne de télévision payante.
4. Quelle est la particularité de certains journaux sur France 3 ?
5. Quelles chaînes n'ont plus le droit de diffuser de la publicité après 20h ?
